Examinations, Retrograde mining. Thompson	784	
EXAMINATION QUESTIONS		
—Ala. firebosses—Volume of air passing per minute; mixed lights in gassy mine; shielded safety lamps; safety lamps in gaseous mine; danger signals in gassy mine; why is marsh gas found near roof and carbon dioxide near floor?	184	
—Anthracite foremen, Districts 1-2.—Mixture and explosive mixture; Avondale disaster; three natural causes governing flow of air in mine; effect regulator on mine resistance; separate traveling-way; air measurements; quantity of air in circulation; diffusion of gases; strength of props 746. Requirements of law in blasting; thickness of pillars; strain on rope; finding depth of shaft; pressure top of dam; reducing accidents. 786		
—Anthracite foremen, Districts 3-7.—Safety lamp, testing for firedamp, requirements, oils used adjustment mine doors for ventilation, examining mine; dynamite and its constituents 328. Volume of air in airway; instructions to prevent accidents from blasts; anthracite law requiring foremen to withdraw men under his charge; pillar drawing in gaseous mine; minimum quantity of air; anthracite law on examination old and new workings.	366	
—Anthracite foremen, Dists. 8-14.—Quantity air; permissible explosives; dividing air current; pitch of prop; enlarging shaft; 406. Causes of mine fires and precautions; cubical contents of sinking bucket; first aid; sinking double-track slope	442	
—Anthracite foremen, Dists. 15 and 16.—Mine gases; precautions in blasting when driving two breasts toward each other; place for open light in mine; removing firedamp; safety lamps; natural and mechanical ventilation; why is mine ventilation necessary?	823	
—Bituminous, Pa., foremen and firebosses—Duties regarding ventilation; reporting accidents; violation mining laws; disobeying instructions; removal of dangers building stoppings, writing daily report; precautions in non-gaseous mines; lamps where carbon dioxide is generated 256. Causes and prevention accidents; drawing room pillars; safeguarding workman in non-gaseous mine worked with open lights on discovery of explosive gas; causes and prevention of fires in non-gaseous mines; equipment to be installed with electrically driven pumps; capacity of double-acting pump	292	
—First-class foremen, Birmingham, Ala.—Material for building airtight or fire-proof stoppings; need of blueprint copy of mine map; water gage reading; percentage of pitch for chutes; area of airway; velocity of air current; water flowing in ditch; percentage stone dust to render coal dust non-explosive; placing stone-dust barriers	562	
—Hoisting engineers, Springfield, Ill.—Movement of pointer per revolution of drum; safety valves; defining pressures; horsepower to pull 20 loaded cars; Norway iron, breaking strain of rope and safe working load; hoisting ropes and cages	21	
—Mine foremen, Olympia, Wash.—Mine inspection by fireboss; mixed lights in mine generating explosive gas; law as to electric locomotives operated by trolley wire in gaseous mine; potential used in trolley system; explosions, causes; law concerning safety lamps 600. Constant used with water gage reading; ventilation; retimbering caved gangway 638. Depth cover foot of slope; pillar drawing, prevention of accidents	674	
—Misc.—Pressure in airway; supplies required by law to be kept at mines for injured; electrical units in common use; effect of opening of door on fan; safety lamp	522	
—Misc.—Flow of gas; counter gangway distance on mine map; regulators; fan ventilation; horsepower to circulate in four splits; circulation of air per man; shot-firing in gaseous mine	712	
—Misc.—Pressure in airways; rubbing surface; distance of crossovers	846	
—Misc.—Pumping; unit pressure of steam on piston; treatment safety lamp full of flame; size of pipe; high piston speed; best boiler for use in coal mines; water consumption of boiler; steam gage and safety valve on boiler	112	
—Misc.—Removal of gas where air is conducted on split system; cause of explosions of firedamp; examination of gassy mine; systems of ventilation	148	
—Misc.—Tensions on main and tail ropes; horsepower of engine determined, water consumed by engine; horsepower of motor	70	
—Misc.—Tensions on main and tail ropes; velocity air current; safety instructions from mine foreman to miner	220
